Analysis of Multivariate Survival Data (Statistics for Biology and Health)

Philip Hougaard

Analysis of Multivariate Survival Data (Statistics for Biology and Health) Philip Hougaard
Survival data or more general time-to-event data occur in many areas, including medicine, biology, engineering, economics, and demography, but previously standard methods have requested that all time variables are univariate and independent. This book extends the field by allowing for multivariate times. As the field is rather new, the concepts and the possible types of data are described in detail. Four different approaches to the analysis of such data are presented from an applied point of view.
