Liquid biofertilizer and its effect on plant growth: Enfluance nitrogen fixing bacteria from liquid biofertilizer and it's effect on plant growth Disha Nayak

Usage of Liouid biofertiler is new scientific approach in the agriculture field. In it mainly plant nutrition compound are present which helping in to the plant better growth.The green revolution brought impressive gains in food production but with insufficient concern for sustainability. Biofertilizers, more commonly known as microbial inoculants, are artificially multiplied cultures of certain soil organisms that can improve soil fertility and crop productivity. Liquid biofertilizer mainly soluble in water and they are in liquid state so apply on field easily. It contain mainly high amount of microorganism and require some diluents nutritional sources for maintain viability of organism. It gives better shelf life, no effect on high temperature, good and fastest growth of crop compare to other fertilizer.
