Algorithmic Problems in Groups and Semigroups (Trends in Mathematics)

Algorithmic Problems in Groups and Semigroups (Trends in Mathematics)
This volume contains papers which are based primarily on talks given at an inter national conference on Algorithmic Problems in Groups and Semigroups held at the University of Nebraska-Lincoln from May ll-May 16, 1998. The conference coincided with the Centennial Celebration of the Department of Mathematics and Statistics at the University of Nebraska-Lincoln on the occasion of the one hun dredth anniversary of the granting of the first Ph.D. by the department. Funding was provided by the US National Science Foundation, the Department of Math ematics and Statistics, and the College of Arts and Sciences at the University of Nebraska-Lincoln, through the College's focus program in Discrete, Experimental and Applied Mathematics. The purpose of the conference was to bring together researchers with interests in algorithmic problems in group theory, semigroup theory and computer science. A particularly useful feature of this conference was that it provided a framework for exchange of ideas between the research communities in semigroup theory and group theory, and several of the papers collected here reflect this interac tion of ideas. The papers collected in this volume represent a cross section of some of the results and ideas that were discussed in the conference. They reflect a synthesis of overlapping ideas and techniques stimulated by problems concerning finite monoids, finitely presented mono ids, finitely presented groups and free groups.

From reader reviews:

Donna Vandyne:

Within other case, little folks like to read book Algorithmic Problems in Groups and Semigroups (Trends in Mathematics). You can choose the best book if you'd prefer reading a book. As long as we know about how is important some sort of book Algorithmic Problems in Groups and Semigroups (Trends in Mathematics). You can add expertise and of course you can around the world by way of a book. Absolutely right, because from book you can recognize everything! From your country until finally foreign or abroad you can be known. About simple thing until wonderful thing you can know that. In this era, we can open a book or even searching by internet system. It is called e-book. You can utilize it when you feel weary to go to the library. Let's go through.

David Dozier:

Your reading sixth sense will not betray an individual, why because this Algorithmic Problems in Groups and Semigroups (Trends in Mathematics) publication written by well-known writer we are excited for well how to make book that could be understand by anyone who else read the book. Written inside good manner for you, still dripping wet every ideas and creating skill only for eliminate your current hunger then you still doubt Algorithmic Problems in Groups and Semigroups (Trends in Mathematics) as good book not only by the cover but also through the content. This is one guide that can break don't assess book by its deal with, so do you still needing another sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to an additional sixth sense.

Latricia Wynkoop:

Is it you actually who having spare time subsequently spend it whole day by watching television programs or just lying on the bed? Do you need something new? This Algorithmic Problems in Groups and Semigroups (Trends in Mathematics) can be the response, oh how comes? The new book you know. You are thus out of date, spending your time by reading in this fresh era is common not a nerd activity. So what these publications have than the others?

Doris Avey:

That e-book can make you to feel relax. This particular book Algorithmic Problems in Groups and Semigroups (Trends in Mathematics) was vibrant and of course has pictures on the website. As we know that book Algorithmic Problems in Groups and Semigroups (Trends in Mathematics) has many kinds or variety. Start from kids until youngsters. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book are generally make you bored, any it offers you feel happy, fun and rest. Try to choose the best book in your case and try to like reading that.
