Saving Heirloom Seeds: Saving Seeds Saves Our Heritage Lara Bennet
Genetic diversity of food crops on earth is eroding and accelerating at an alarming rate. We are losing thousands of years of genetic selection and adaptation. Each diverse genetic strain developed it's own resistance to diseases and local pests. Just how dangerous is this? This is the only resource which stands between us and catastrophe. Learning how to collect and save seeds is easy and fun. In this guide you will learn step by step in the seed saving process. You will also get some great advice on harvesting, proper storage and caring for this seedlings. This guide is great for gardeners at any experience level, this information is sure to keep your plants healthy for generations. More likely than not, you only have a week's supply of food in your home. Only a small percentage of people are more prepared. Even if they are not prepared to survive long term without food, there is a limit to how much food they can store and how long they can store it. Starting your plants from seeds and know that your vegetables, herbs and flowers are cared for with love. The best part is harvesting these seeds for the next season. All for free! Surviving on survival food won't get you far. When it runs out it runs out. You're going to need a real food source, a healthy food source for you and your family. Saving seeds is the only way to go. Pick up this guide today!
