Stress and Health: Research and Clinical Applications (Biobehavioural Perspectives on Health and Disease Prevention) John G Carlson, Dianna T Kenny, F Joseph McGuigan, John L Sheppard
With contributions from some of the best known names in psychology today, *Stress and Health: Research and Clinical Applications* presents a truly global perspective on current developments in the field divided into five broad categories: biological, physiological and psychological bases of stress; health consequences of stress; management of stress and stress-related disorders; stress, cardiovascular disease and cancer; and occupational stress. Unique in that it brings together, in one volume, the work of researchers and theorists who would not otherwise have the opportunity to collaborate, and designed primarily for use by professionals in health psychology, counselling and behavioral medicine, *Stress and Health* will also prove a valuable resource for academics and students.
