Survival Analysis: A Self-Learning Text (Statistics for Biology and Health)

David G. Kleinbaum, Mitchel Klein

Survival Analysis: A Self-Learning Text (Statistics for Biology and Health) David G. Kleinbaum, Mitchel Klein

An excellent introduction for all those coming to the subject for the first time.

New material has been added to the second edition and the original six chapters have been modified.

The previous edition sold 9500 copies world wide since its release in 1996.

Based on numerous courses given by the author to students and researchers in the health sciences and is written with such readers in mind.

Provides a "user-friendly" layout and includes numerous illustrations and exercises.

Written in such a way so as to enable readers learn directly without the assistance of a classroom instructor.

Throughout, there is an emphasis on presenting each new topic backed by real examples of a survival analysis investigation, followed up with thorough analyses of real data sets.

From reader reviews:

Michael Coffman:

Book is usually written, printed, or created for everything. You can understand everything you want by a guide. Book has a different type. We all know that that book is important factor to bring us around the world. Beside that you can your reading talent was fluently. A e-book Survival Analysis: A Self-Learning Text (Statistics for Biology and Health) will make you to become smarter. You can feel a lot more confidence if you can know about everything. But some of you think which open or reading any book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you looking for best book or ideal book with you?

Albert Chesson:

Information is provisions for those to get better life, information today can get by anyone with everywhere. The information can be a expertise or any news even a problem. What people must be consider when those information which is inside former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Survival Analysis: A Self-Learning Text (Statistics for Biology and Health) as your daily resource information.

Paul Avila:

Reading a reserve can be one of a lot of pastime that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new information. When you read a reserve you will get new information because book is one of a number of ways to share the information or their idea. Second, reading a book will make an individual more imaginative. When you reading a book especially fictional book the author will bring someone to imagine the story how the people do it anything. Third, you are able to share your knowledge to other folks. When you read this Survival Analysis: A Self-Learning Text (Statistics for Biology and Health), you could tells your family, friends along with soon about yours e-book. Your knowledge can inspire different ones, make them reading a publication.

Homer Holmes:

Playing with family in a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Survival Analysis: A Self-Learning Text (Statistics for Biology and Health), you can enjoy both. It is fine combination right, you still want to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come

on its called reading friends.
