The Economics of Production

Bruce R. Beattie, C. Robert Taylor, Myles J. Watts

The Economics of Production Bruce R. Beattie, C. Robert Taylor, Myles J. Watts
The Economics of Production is intended to serve as a textbook for courses in production economics theory - aimed at first-year graduate students and advanced undergraduates in economics, agricultural economics, and management. Technical aspects of production and input-side issues are given equal attention with the common notions of production costs, product supply, and other output-side issues found in most microeconomic theory texts. Given the authors' informal writing style and penchant for detailed development of mathematical derivations, the result is a reader friendly product with ample intuitive motivation and concern for empirical application.
