"A comprehensive look at African weapons: how they were made, used, and their religious significance. Primary sources were used whenever possible. Chapters are organized by weapon rather than by people or geographic location. The detailed index permits searches for popular arms and armor used by many peoples. Also, a clear introductory map identifying the peoples and places discussed. The excellent, large pictures will not disappoint students, and the detailed text is quite readable. Most of the photographs are black and white (many are historical), but there are three sections of full-color plates." - Claudia Moore
