Energy Accounts: Architectural Representations of Energy, Climate, and the Future

Energy Accounts: Architectural Representations of Energy, Climate, and the Future

How does one tell the story of energy production, use, or conservation in a manner sufficiently convincing to influence policy, behavior, and design? *Energy Accounts* explores potential answers to this question through compelling images, data visualizations, narratives, and other examples of accounting for energy. Organized into a collection containing both examples of best practices and critiques, this impressive array of projects and contributors combines text and graphic material to explore different representations of energy data. Including work from Kieran Timberlake, SHoP, AMO, Lateral Office, WOHA, and many more, the book boasts a unique graphic design which supports and enhances its role as a valuable resource for professionals and students in architecture, engineering, and urban design.
