Experience offers a reading experience like no other. A heat-sensitive cover by Olafur Eliasson reveals words, colors, and a drawing when touched by human hands. Endpapers designed by Carsten Höller are printed in ink containing carefully calibrated quantities of the synthesized human pheromones estratetraenol and androstadienone, evoking the suggestibility of human desire. The margins and edges of the book are designed by Tauba Auerbach in complementary colors that create a dynamically shifting effect when the book is shifted or closed. When the book is opened, bookmarks cascade from the center, emerging from spider web prints by Tomás Saraceno. *Experience* produces experience while bringing the concept itself into relief as an object of contemplation. The sensory experience of the book as a physical object resonates with the intellectual experience of the book as a container of ideas.

Experience convenes a conversation with artists, musicians, philosophers, anthropologists, historians, and neuroscientists, each of whom explores aspects of sensorial and cultural realms of experience. The texts include new essays written for this volume and classic texts by such figures as William James and Michel Foucault. The first publication from MIT's Center for Art, Science, & Technology, *Experience* approaches its subject through multiple modes.

Publication design by Kimberly Varella with Becca Lofchie, Content Object Design Studio.

Neil Nilsson:

As a university student exactly feel bored to help reading. If their teacher requested them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Experience: Culture, Cognition, and the Common Sense (MIT Press) can make you sense more interested to read.
