Indisputable Proof: That CO2 Does Not Dominate Global Climate Dr. Bobby Leonard, Dr. Arthur C. Lucas

Much of what has been presented in this manuscript is common knowledge to not only geo-physicists but to the lay person that view televisions excellent educational channels such as the National Geographic and Discovery channels. In many cases, there are more than one theory (or even many) such as the origin and details of the Moon becoming part of Earth's system around the Sun. In these cases, we have presented what we believe to be the most probable scenarios and present them as "probable". There are many proxies with respect to Earth's past climate, present status and supportive evidence for Earth's climate future. We have relied heavily on the ice core data because we believe they provide the most accurate and consistent for our past climate. As we pointed out, the ice core data for CO2 are technically not proxy data (i.e. representative agent for CO2) but, as shown in the Figure 55, tiny bubbles provides direct samples of CO2 from the ancient past. There are three primary sources of ice core uncertainties, timescale, diffusion, and sampling. Altogether, these are estimated to be resolvable to within 3% standard deviation (Steig 2005). We are re-assured by NOAA's extensive support of the many American and world-wide groups engaged in ice core data collection, analysis and journal support for publication. Our work is as a result of work by others such as Siegenthaler et al (2005), Petit et al (1999), Siddall et al (2003), Soon et al (2007), Pagani et al (2005, 2006), Indermuhle et al (2000), Dahl-Jensen et al (2012) and many, many more. With complete confidence in the Antarctica, Greenland, deep ocean and other data, we show indisputable evidence that airborne carbon dioxide concentrations has not in the past, does not now dominate our Global Climate and in particular does not dominate Global Surface Air Temperature. Further, that all periods of the Glacial-to-Interglacial- back to-Glacial global climate behavior is dominated by extraterrestrial forces, and indisputably the current Holocene and past Interglacial Periods. In Figures 44 and 45, we show that most probably the three astronomical forces, even in the interglacial periods vary significantly and are far from being understood. Thus, we must accept that we do not understand the mechanisms of our past, present and future Global Climate. But this work does prove that the astronomical forces dominate our global climate and carbon dioxide plays only a small secondary role.

From reader reviews:

Scott Roche:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each book has different aim as well as goal; it means that publication has different type. Some people experience enjoy to spend their time to read a book. They can be reading whatever they take because their hobby is reading a book. How about the person who don't like reading through a book? Sometime, man or woman feel need book when they found difficult problem or even exercise. Well, probably you will need this Indisputable Proof: That CO2 Does Not Dominate Global Climate.

Augustine Klotz:

In other case, little people like to read book Indisputable Proof: That CO2 Does Not Dominate Global Climate. You can choose the best book if you'd prefer reading a book. So long as we know about how is important a new book Indisputable Proof: That CO2 Does Not Dominate Global Climate. You can add knowledge and of course you can around the world by just a book. Absolutely right, because from book you can realize everything! From your country till foreign or abroad you may be known. About simple matter until wonderful thing it is possible to know that. In this era, you can open a book or maybe searching by internet product. It is called e-book. You should use it when you feel uninterested to go to the library. Let's learn.

Joel Jones:

Here thing why this particular Indisputable Proof: That CO2 Does Not Dominate Global Climate are different and trustworthy to be yours. First of all studying a book is good however it depends in the content than it which is the content is as tasty as food or not. Indisputable Proof: That CO2 Does Not Dominate Global Climate giving you information deeper as different ways, you can find any reserve out there but there is no guide that similar with Indisputable Proof: That CO2 Does Not Dominate Global Climate. It gives you thrill reading through journey, its open up your personal eyes about the thing which happened in the world which is perhaps can be happened around you. You can bring everywhere like in recreation area, café, or even in your way home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Indisputable Proof: That CO2 Does Not Dominate Global Climate in e-book can be your choice.

Charles Shin:

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't evaluate book by its include may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer may be Indisputable Proof: That CO2 Does Not Dominate Global Climate why because the fantastic cover that make you consider concerning the content will not disappoint

an individual. The inside or content is fantastic as the outside or perhaps cover. Your reading sixth sense will directly make suggestions to pick up this book.
