Modeling and Simulation of Mineral Processing Systems

R. Peter King

Modeling and Simulation of Mineral Processing Systems R. Peter King
Dr. R. Peter King covers the field of quantitative modeling of mineral processing equipment and the use of these models to simulate the actual behavior of ore dressing and coal washing as they are configured to work in industrial practice.

The material is presented in a pedagogical style that is particularly suitable for readers who wish to learn the wide variety of modeling methods that have evolved in this field. The models vary widely from one unit type to another. As a result each model is described in some detail.

Wherever possible model structure is related to the underlying physical processes that govern the behaviour of particulate material in the processing equipment.

Predictive models are emphasised throughout so that, when combined, they can be used to simulate the operation of complex mineral processing flowsheets. The development of successful simulation techniques is a major objective of the work that is covered in the text.

* Covers all aspects of modeling and simulation
* Provides all necessary tools to put teh theory into practice
* Free CD ROM included

From reader reviews:

Micheal Taylor:

The book Modeling and Simulation of Mineral Processing Systems can give more knowledge and information about everything you want. So just why must we leave a very important thing like a book Modeling and Simulation of Mineral Processing Systems? Some of you have a different opinion about guide. But one aim this book can give many info for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or data that you take for that, it is possible to give for each other; it is possible to share all of these. Book Modeling and Simulation of Mineral Processing Systems has simple shape but you know: it has great and massive function for you. You can seem the enormous world by wide open and read a book. So it is very wonderful.

Thomas Lemos:

As we know that book is vital thing to add our information for everything. By a e-book we can know everything we want. A book is a set of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This guide Modeling and Simulation of Mineral Processing Systems was filled concerning science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading the book. If you know how big good thing about a book, you can experience enjoy to read a guide. In the modern era like right now, many ways to get book which you wanted.

Patricia Stroud:

That reserve can make you to feel relax. This book Modeling and Simulation of Mineral Processing Systems was colourful and of course has pictures around. As we know that book Modeling and Simulation of Mineral Processing Systems has many kinds or style. Start from kids until teens. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.

Kurt Bohnert:

Reserve is one of source of expertise. We can add our understanding from it. Not only for students and also native or citizen want book to know the up-date information of year to be able to year. As we know those guides have many advantages. Beside we add our knowledge, also can bring us to around the world. By the book Modeling and Simulation of Mineral Processing Systems we can have more advantage. Don't you to be creative people? To be creative person must want to read a book. Only choose the best book that appropriate with your aim. Don't end up being doubt to change your life with that book Modeling and Simulation of Mineral Processing Systems. You can more pleasing than now.
